

Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.-9. (Canceled)

10. (Currently Amended) A series of components for a vehicle seat for a motor vehicle, comprising a cushion core, a plurality of intersecting ventilation ducts running along and inside at least one of a seat surface and a backrest surface and having a constant cross section, and a plurality of ventilation channels arranged essentially transversely to the ventilation ducts, having a constant cross section, penetrating the entire thickness of the cushion core and extending from the ventilation ducts as far as a rear wall facing away from at least one of the seat surface and backrest surface, wherein a predetermined arrangement of at least one of the ventilation ducts and the ventilation channels in the cushion core defines regions ventilated to different extents adapted to a ventilation requirement of a standard vehicle occupant, and the ventilation ducts are configured as a duct grill so as to intersect in a connected manner in terms of flow.

11. (Previously Presented) The series of components as claimed in claim 10, wherein the ventilation requirement is adapted to a body pressure distribution.

12. (Previously Presented) The series of components as claimed in claim 10, wherein the ventilation requirement is adapted to body contact points.

13. (Canceled)

14. (Currently Amended) The series of components as claimed in one of claim [[13]] 1, wherein the ventilation requirement is adapted to a body pressure distribution.

15. (Previously Presented) The series of components as claimed in one of claim 14, wherein the ventilation requirement is also adapted to a body contact points.

16. (Currently Amended) The series of components as claimed in claim [[13]] 1, wherein at least one of the ventilation ducts and ventilation channels is essentially arranged regularly.

17. (Currently Amended) The series of components as claimed in one of claim [[13]] 1, wherein at least one of the ventilation ducts and the ventilation channels are arranged only in regions with ventilation provided.

18. (Currently Amended) The series of components as claimed claim [[13]] 1, wherein at least one of the ventilation ducts and the ventilation channels are closed in regions in which no ventilation is provided.

19. (Previously Presented) The series of components as claimed claim 18, wherein at least one of the ventilation ducts and the ventilation channels are arranged only in regions with ventilation provided.

20. (Currently Amended) The series of components as claimed in claim [[13]] 1, wherein the vehicle seat is a passively ventilated vehicle seat.

21. (Previously Presented) The series of components as claimed in claim [[13]] 1, wherein the vehicle seat is an actively ventilated vehicle seat, and at least one fan or a miniature ventilator is operatively associated therewith.
